Eve.ai

Real-Time Voice Assistant with Intelligent Task management

The current generation of voice assistants lacks features for personalized user experiences, efficient multi-tasking, and context-aware interactions. This project aims to develop a novel, real-time AI/ML-powered voice assistant.

Tech Stack

Flask

MongoDB
Express
React JS
NodeJS

LLMs
(Gemini, GPT 4)

Libraries:
React 3 Fiber
Whisper
Pico voice
SMTP
Rhubarb

Features

- **3D Avatar - Eve.**

Features a 3D avatar of the assistant to interact with the
